Features & Specifications

MA 100 SERIES

Features

This device contains one horn and one control box. Its advanced design with lightweight, compact and selectable tone audible signal provides continuous duty and economical operation. All the unique tones are produced by digital micro-controller unit.(MCU) The built-in automatic control circuitry enables more than 10 kinds of selectable tone to be produced with the variation of frequency.

※ This feature is particularly useful in some specific situations where distinctive tone is required, such as areas with high-level noise or where a different sound is required to distinguish from other nearby signals.

Applications(suggested)

Specifications

Power consumption	<45W
Operating voltage/current	12~48VDC/max3A..... MA100A 100~240VAC(60/50HZ)/max0.6A..... MA100C
Volume	in 1 meter of distance Over 120 dB
Resistance	8Ω
Anti in-rush	over 4000V
Water-proof	IP65
Operating Temp.	-20 ° C~+60 ° C(humidity under 85%)
Anti-vibration	Tested on the basis of 45m/Sec ²
Weight	3,300±100g
Dimension	145X127X101(mm)(Control box housing) 220X220X271(mm)(Siren housing)
